

Amounts Generally Billed:

Millinocket Regional Hospital determines the Amounts Generally Billed (AGB) by multiplying the gross charges for any emergency or any other medically necessary care it provides to a Financial Assistance Policy (FAP) eligible patient by an AGB percentage.

The AGB is calculated based on all claims allowed by Medicare and private health insurers over the 12-month period of 1/1/2020 through 12/31/2020 divided by the associated gross charges for those claims.

The AGB is calculated at least once annually.

All claims allowed means all claims reimbursed by Medicare and private health insurers plus amounts expected to be paid by the patient in the form of co-insurance, copayment or deductibles. Dates are processed dates, not dates of service.

Millinocket Regional Hospital's Combined Rate as of 12/31/20 is 51%. The Rate is based on actual past claims allowed by Medicare and all private insurers.
