### Your Gift Helps Others...

The Emergency Department (ED) expansion/ renovation project features a 10,000 sq. ft. addition and a sophisticated air exchange system that will contain/reduce/eliminate airborne pathogens, removing contaminants from the healing space. This reengineering of our 1950s building will accommodate increased volume and the diverse physical and mental health needs of our region. The project will be funded through gifts, grants and other appropriations and will also include:

- Increase the ED in size from 4800 to 10,000 sq. feet
- Expand ambulance bay to accommodate surges in volume and facilitate timely transfers
- A dedicated Emergency Department entrance and new main hospital entrance/waiting room
- Ten treatment rooms outfitted for specialized care (doubling current capacity)
- Three treatment rooms for trauma and cardiac care
- Four dedicated rooms designed for psychiatric care and substance use disorder patients
- Negative air pressure incorporated into all spaces
- A decontamination room with dedicated entrance
- Updates to lab and imaging areas
